### Specification

#### Hinge leafs

Aluminum

Anodized, natural color

Bearing bushing / Cover cap Plastic, Polyamide (PA)

### Graphite gray, RAL 7024 Tapered dowel pin ISO 8741

Steel

Zinc plated, blue passivated

#### RoHS

### On request

- · Other lengths and hole spacings
- Other finishes

Technical Information	Page		
Mounting information	QVX		
List of Hinge Types	QVX		
Plastic Characteristics	QVX		

Hinges GN 2295 are made of drawn profiled aluminum and are used on doors and covers, for example.

Given the external hinge leafs, type A hinges allow mounting with a very small door gap. The type I is fastened in the door gap. The mounting screws are therefore inaccessible and hence protected from vandalism when the door is closed.

The hinges are delivered loose and must be mounted according to the accompanying instructions. Any hinge combination may be realized (if needed, also by shortening the middle wing) thanks to the modular design and available accessories.
