Types of fork joint shafts

Snap-on spring

The snap-on spring pin is easily mounted and dismantled. It is therefore particularly suitable for applications where the articulated connection needs to be loosened often.

3.6

KL-shaft safety

The pin with side mount ring can be fitted and dismantled without tools, i.e. by hand.

3.7

3.8

SL-shaft safety

The pin with safety clip requires a tool for dismantling (e.g. a screw driver). It is therefore better secured.

3.9
