Specification

- Steel —
- Case-hardened steel C10 zinc plated, blue passivated
- Bearing pins tempered
- Bearing rivets (for size 355 and up) case-hardened
- Stainless Steel **NI**
- AISI 304
- All moving parts lubricated with special grease
- Hand grip High quality, oil resistant, red plastic
- Clamping screw GN 708.1, type A
 - Steel, zinc plated / Stainless Steel, AISI 304
 - Rubber tip 85 Shore A
- *Stainless Steel characteristics → Page 1489*
- **RoHS**

Information

GN 820.3 toggle clamps have a safety function whereby, during closing, a spring loaded safety hook latch ensures a secure locking connection. It prevents the inadvertent unlocking of the clamp due to vibrations or an accidental attempt of loosening / opening of the clamp. To open and release the clamp, pull up on the finger grip to disengage the safety hook latch mechanism (one hand operation).

They work according to the toggle principle: lever and clamping bar move in the opposite direction. They require less space for the clamping action.

Toggle clamps in the U-bar version with two flanged washers (Type ML) can accommodate an application specific clamping screw. A clamping screw with neoprene rubber tip is also included for type MLC.

Toggle clamps in the type OL version can either be utilized by welding the clasp which can then accommodate an application specific hold-down fastener component, or by utilizing the bar in conjunction with the GN 809 holders for clamping screws to hold the work piece in place.

Accessory

- Clamping screws → *Page 585 ff.*
- Holders for clamping screws GN 801 (for type ML) → *Page 590*
- Holders for clamping screws GN 809 (for type OL) → *Page 591*
- Clamping arm extenders GN 801.1 (for type ML) → *New products*
- Clamping arm extenders GN 801.2 (for type ML) → *New products*
- Clamping arm extenders GN 809.1 (for type OL) → *New products*
