| Mounting tab Stainless steel AISI 316 Plain finish | |
| Key ring Stainless steel AISI 316 Ti Plain finish, tumbled | |
| Press sleeves Stainless steel AISI 316 | |
| RoHS | |

Retaining cables GN 111.8 are available in 3 different types and can therefore be used in a wide range of applications, e.g. for loss protection or as connecting and mounting cables.

Due to the selection of materials, the retaining cables are suitable for use in highly corrosive environments.

On delivery the key rings are already mounted on the retaining cable. With type A, both rings have the same diameter d₁.

The alignment of the cable eyelets and mounting tabs may deviate from the drawing. The load values given in the table are non-binding guide values and rule out any liability.
