Specification

 Housing Aluminum Anodized, natural color

ALN ALS

· Spirit level element Glass plastic body Filling

Anodized, black

Colorless-transparent Κ

· Casting compound Mineral-based

RoHS

Accessory

Adjustment Plates GN 2277.1 → Page 318

On request

- · Filling, green-transparent
- · Other sensitivities
- · Housing in brass or stainless steel

Information

Bull's eye spirit levels GN 2277 are used to check the horizontal position of jigs, machines, devices, appliances and instruments.

The spirit levels are aligned in relation to the reference surface so that the bubble is located inside the marking ring when the horizontal position of the contact surface is achieved.

Application example

Bull's eye spirit levels and leveling elements - in this example, leveling elements GN 355 and assembly tool GN 355.1 - are ideal to use when a holding plate is to be brought into an exact horizontal position.

Even after the initial adjustment, the bull's eye level remains in the unit so that the correct alignment can be checked and adjusted again.
