Specification

Handle

Plastic

Technopolymer (Polyamide PA)

- Glass fiber reinforced
- Temperature resistant up to 130 °C
- Black-gray, similar RAL 7021, matte SG
- Threaded stud and retaining screw Steel, blackened
- Plastic Characteristics → Page 2158
- RoHS

Information

4

The design and handling of the adjustable hand lever GN 604.2 satisfy the high standards of the Ergostyle® product family.

Safety hand levers GN 604.2 are used where the inadvertent loosening or readjustment can result in accidents.

If not operated, the lever is not linked to the threaded insert, i.e. the hand lever turns freely.

As soon as the lever hub is pushed down, both serrations will engage, allowing the fixture to be released or clamped.

After "releasing", the connection disengages through spring tension.
