Specification

Knob
Plastic, Polyamide (PA)
- Shock-resistant
- Black, matte finish

Axial bearing / Bushing
Case-hardening steel
Nitrided, blackened

RoHS

On request

- With threaded stud

Hand knobs GN 6335.9 have a clamping contact area which is connected to the knob via an ball bearing (axial bearing).
This has led to the following advantages:
- Doubled clamping force through vastly reduced friction
- There is no movement on the contact area between adjustable hand lever and component which greatly reduces any marking on the clamping area
- In addition a reduced creep factor has been achieved by the increased preload
