Stainless Steel Characteristics	QVX	

Catches GN 724.10 are combined with spring latches and indexing plungers of series GN 724 ff. when the application requires multiple indexing positions or catches. The orientation of the chamfered pin according to the combination options shown on the standard sheet must be taken into account when selecting the catch.

The slotted holes with hex enable fastening with socket cap screws ISO 4762, hex head screws DIN 931 or hex nuts DIN 934.
