

## GN 113.3

## GN 113.4

Page 1012

Ø 5 / 6 / 8 / 10 / 12 / 16 / 20 / 25

With tightened gripping tray

### Function:

- The locking element consists of 2 balls, which are “retracted” by press of a button and brought back into the (form-locking) lock function by a pressure spring.

### Features:

- GN 113.3: Stainless steel AISI 303
- GN 113.4: Stainless steel AISI 630, precipitation-hardened

## GN 113.5

## GN 113.6

Page 1013

Ø 5 / 6 / 8 / 10 / 12 / 16

With plastic knob

### Function:

- The locking element consists of 2 balls, which are “retracted” by press of a button and brought back into the (form-locking) lock function by a pressure spring.

### Features:

- GN 113.5: Stainless steel AISI 303
- GN 113.6: Stainless steel AISI 630, precipitation-hardened

## GN 113.9

## GN 113.10

Page 1014

Ø 5 / 6 / 8 / 10 / 12 / 16 / 20 / 25

With stainless steel knob

### Function:

- The locking element consists of 2 balls, which are “retracted” by press of a button and brought back into the (form-locking) lock function by a pressure spring.

### Features:

- GN 113.9: Stainless steel AISI 303
- GN 113.10: Stainless steel AISI 630, precipitation-hardened

## GN 113.7

## GN 113.8

Page 1015

Ø 5 / 6 / 8 / 10 / 12 / 16 / 20 / 25

With plastic T-handle

### Function:

- The locking element consists of 2 balls, which are “retracted” by press of a button and brought back into the (form-locking) lock function by a pressure spring.

### Features:

- GN 113.7: Stainless steel AISI 303
- GN 113.8: Stainless steel AISI 630, precipitation-hardened

## GN 113.11

## GN 113.12

Page 1017

Ø 5 / 6 / 8 / 10 / 12 / 16 / 20 / 25

With plastic L-handle

### Function:

- The locking element consists of 2 balls, which are “retracted” by press of a button and brought back into the (form-locking) lock function by a spring.

### Features:

- GN 113.11: Stainless steel AISI 303
- GN 113.12: Stainless steel AISI 630, precipitation-hardened

## GN 314

Page 1018

Ø 6 / 8 / 10 / 12 / 16 / 20  
With plastic L-handle  
lockable

### Function:

- The locking element consists of a pawl on the front end of the pin, which is retracted or extended into the locking position by turning the key 180°.

### Features:

- Pin, pawl: Stainless steel AISI 303
- Locking mechanism, zinc / stainless steel
- Key, steel nickel plated

3.1

3.2

## GN 114.2

GN 114.3

Page 1019 / 1020

Ø 6 / 8 / 10 / 12 / 16 / 20  
With plastic knob

### Function:

- The locking element consists of rectangular locking pawls, which are "retracted" by press of a button a brought back into the lock function by a pressure spring (DBP).

### Features:

- GN 114.2
  - Pin steel, zinc plated
  - Knob, push-button, slide plastic
- GN 114.3
  - Pin stainless steel AISI 303
  - Knob, push-button, slide plastic

3.3

3.4

## GN 114.6

Page 1021

Ø 6 / 8 / 10 / 12 / 16 / 20  
With stainless steel knob

### Function:

- The locking element consists of rectangular locking pawls, which are "retracted" by press of a button a brought back into the lock function by a pressure spring (DBP).

### Features:

- Pin stainless steel AISI 303
- Knob, push-button, slide stainless steel

3.5

3.6

## GN 214.2

GN 214.3

GN 214.6

Page 1022 / 1023

Ø 6 / 8 / 10 / 12 / 16  
With lifting ring  
(Stainless steel AISI 301)

### Function:

- The locking element consists of rectangular locking pawls, which are "retracted" by press of a button a brought back into the lock function by a pressure spring (DBP).

### Features:

- GN 114.2
  - Pin steel, zinc plated
  - Push-button, slide plastic
- GN 114.3
  - Pin stainless steel AISI 303
  - Push-button, slide plastic
- GN 114.6
  - Pin stainless steel AISI 303
  - Push-button, slide stainless steel AISI 303

3.8

3.9

## GN 124.2

Page 1024

Ø 6 / 8 / 10 / 12

With plastic knob

### Function:

- The locking element consists of one or two guide balls that are held in the locking position using a pressure spring. The bolts can be quickly and easily inserted and removed from the locating hole.

### Features:

- Pin stainless steel AISI 303
- Knob plastic

## GN 124.1

Page 1025

Ø 6 / 8 / 10 / 12

With plastic knob

### Function:

- Combined with magnetic components, the magnet fitted at the bottom of the knob holds the locking pins in the axial direction.
- Good surfaces and perpendicular drilling heads help in achieving extremely good axial retaining forces.

### Features:

- Pin stainless steel AISI 303
- Knob plastic
- Retaining magnet neodymium, iron, boron

## GN 113.1

Page 1026

Ø 6 / 8 / 10 / 12

With plastic handle

### Function:

- The ball lock pins are used for quick fixing of thin-walled parts e.g. sheets.
- By depressing the spring-loaded push button the pin advances and at the same time frees the two balls.

### Features:

- Pin stainless steel AISI 303
- Handle plastic

## GN 2342

Page 1028

Type B / E

Ø 8 / 10 / 12 / 16 / 20

### Function:

- With type B and E assembly pins, axial positioning is performed with a collar or eyelet washer.
- Axial securing is by means of a transverse hole (id. no. 2) in which a cotter pin is inserted.
- Assembly pins with eyelet washers (Type E), including the matching spring cotter pin, can additionally be secured against loss with a retaining cable.

### Feature:

- Pin stainless steel AISI 304

**GN 2342**  
**Page 1028**  
**Type L**

Ø 8 / 10 / 12 / 16 / 20

**Function:**

- With type L assembly pins, axial positioning is by means of a fastening tab.
- Fastened with a countersunk screw, the fastening tab holds the assembly pin in the hole so that it is secured against rotation and does not have any play.

**Feature:**

- Pin stainless steel AISI 304

3.1

3.2

**GN 124.3**  
**Page XYZ**

Ø 8 / 10 / 12  
 with eyelet washer

**Function:**

- The locking element consists of one or two guide balls that are held in the locking position using a pressure spring. The bolts can be quickly and easily inserted and removed from the locating hole.

**Features:**

- Pin stainless steel AISI 303
- Washer stainless steel AISI 316LHC, metal injection molded

3.3

3.4

**GN 113.30**  
**Page XYZ**

Ø 6 / 8 / 10

**Type M**

With tightened gripping tray

**Function:**

- The locking element consists of 2 balls, which are "retracted" by press of a button and brought back into the (form-locking) lock function by a pressure spring.

**Features:**

- Pin Titanium
- Balls ceramic

3.5

3.6

**GN 113.30**  
**Page XYZ**

Ø 6 / 8 / 10

**Type L**

With plastic L-knob

**Function:**

- The locking element consists of 2 balls, which are "retracted" by press of a button and brought back into the (form-locking) lock function by a pressure spring.

**Features:**

- Pin Titanium
- Knob plastic
- Balls ceramic

3.7

3.8

3.9

GN 113.30

Page XYZ

Ø 6 / 8 / 10

**Type T**

With plastic T-knob

**Function:**

- The locking element consists of 2 balls, which are “retracted” by press of a button and brought back into the (form-locking) lock function by a pressure spring.

**Features:**

- Pin Titanium
- Knob plastic
- Balls ceramic
